Health Track

The Health Track focuses on gaining and maintaining good health by obeying The Law of Natural Anointing.

Youth Sports Track

The Youth Sports Track focuses on character development. How do coaches as mentors push athletes to eclipse natural anointing?

Religious Track

The Religious Track focuses on the distinction between natural anointing, supernatural anointing, and spiritual anointing.

Symposium Overview

The Law of Natural Anointing Symposium is designed to explore diverse perspectives on the distinction between natural, supernatural and spiritual anointing.

The symposium further examines how health, sports, and religion can be used as a vehicle in understanding the progression from natural law to spiritual law.

The goal of the symposium is to provide participants with a model that includes values and concepts to enhance sustainable character development.

Participants will engage in Community Tables Interactive Workshops. The participants will share inclusive community building values while developing solutions that move all groups from Diversity, to Unity, and on to Community.
